LASER SURVEYS
Laser scanning technology provides a fast and accurate method of capturing 3D data. The resulting point cloud can be used to create a highly detailed and accurate 3D model of the scanned object or area. This data can be used for a wide range of applications, including building information modelling (BIM), infrastructure management, and heritage recording.

NOTES
This drawing is a lease plan and is not a structural drawing. It is based on a laser scan of the building and is intended to show the layout of the building and the location of the lease. It is not intended to be used for structural purposes. The drawing is based on a laser scan of the building and is intended to show the layout of the building and the location of the lease. It is not intended to be used for structural purposes.

NOTES
Leased area marked in red as per the survey. Limited as marked drawing.
